Regional development banks (RDB) have become increasingly important in the world economy, but have also been relatively under-researched to date. This timely volume addresses this lack of attention by providing a comprehensive, comparative and empirically informed analysis of their origins, evolution and contemporary role in the world economy through to the second decade of the Twenty-First Century.

FEATURES

- Original research into all the main regional development banks — with numerous interviews undertaken.
- This volume is one of the first to comprehensively cover the main regional development banks around the world from their establishment to the contemporary period.
- Eight regional development banks are examined in comparative context with the aim of exploring themes common to all the banks but also their unique features.

Judith Clifton, Professor and Founding Director of the Jean Monnet Chair of EU Economic Policy at the University of Cantabria and Principal Investigator of the TOKEN (Horizon2020, 4 Mill EUR, 2020-24). **Daniel Diaz Fuentes**, Professor of Economics at the University of Cantabria and Visiting Fellow at Oxford Department of International Development, University of Oxford, from October 2019 to June 2020. **David Howarth**, Professor of European Political Economy at the University of Luxembourg.
